

## **BIG THANKS AND GREAT APPRECIATION!**

Dear Parish Family Members,

With immense gratitude to God, the Father and big thanks and great appreciation to each and every one of you, hereby, with full of joy and satisfaction, we present to you the Annual Financial Report of the Fiscal Year 2022-2023. As you may notice in the statement, we have sailed through a smooth sea, without being tossed by big storm. As I raise my heart to God with praise and thanks I also sincerely thank you for your full cooperation and support during this fiscal year. During the three years period we have implemented a few projects with ease. Last fiscal year our major project was the replacement of the kneelers and adding the seat cushion. I would like to acknowledge the generous support of the Parishioners to complete this project smoothly.

We have couple maintenance project for this year also. Already we have finished the concrete work of the porch which cost us above \$20,000. We are waiting for the replacement of the front door. Thanks to the generous donation of a few good willing people we got the money more than what we need to meet the cost of the door which is \$5400. Though I am not supposed to mention the individual name, I am very thankful for their generosity. Meanwhile, we have taken care of the roof leakage with the generous labor donation of couple of employees from Independent Roofing and my gratitude and appreciation go to them.

As your general Sunday contribution is steady we are keeping up with our yearly budget and also we have some saving, as you see in the statement. Of course, we need a little reserve fund as any emergency can happen. As I sincerely thank you for your full hearted support, I also request you to be kind enough to continue your support during this fiscal year too. Since the inflation rate is high it is very hard to keep the expenses under control. At the same time, Finance Council and myself are very cautious and careful in spending the money.

With Love and Prayerful wishes to all,

Fr. Sebastian
